

### **1.1: Create a basic HTML page and link Bootstrap 5 via CDN.**

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Bootstrap 5 Setup</title>

  <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css"
rel="stylesheet">

  <link href="bootstrap.min.css" rel="stylesheet" onerror="this.onerror=null;
this.href='bootstrap.min.css';">

</head>

<body>

  <h1 class="text-center">Hello Bootstrap 5</h1>

</body>

</html>
```

### **Exercise 1.2: Set up a project using npm or downloaded Bootstrap files. Use the downloaded files in a sample HTML page.**

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Bootstrap 5 Setup</title>

  <link rel="stylesheet" href="node_modules/bootstrap/dist/css/bootstrap.min.css">

  <script src="node_modules/bootstrap/dist/js/bootstrap.bundle.min.js"></script>

<body>

  <h1 class="text-center">Hello Bootstrap 5</h1>
```

</body>

</html>

**Exercise 2.1: Explore the structure of the downloaded Bootstrap directory. Identify and explain the purpose of the CSS, JS, and icons folders.**

css/: Contains bootstrap.min.css (compiled CSS).

js/: Contains bootstrap.bundle.min.js (includes Popper.js for dropdowns/tooltips).

icons/: Optional, used when Bootstrap Icons are included.

**Exercise 2.2: Modify your HTML to include Bootstrap's JavaScript plugins via bootstrap.bundle.min.js.**

I have already used.

<script src="node\_modules/bootstrap/dist/js/bootstrap.bundle.min.js"></script>

**Exercise 3.1: Create a container with three columns that stack vertically on mobile, two-per-row on tablets, and three-per-row on desktops.**

**Exercise 3.2: Use .container, .row, and .col-\* classes appropriately for responsive design.**

<!DOCTYPE html>

<html lang="en">

<head>

<meta charset="UTF-8">

<meta name="viewport" content="width=device-width, initial-scale=1.0">

<title>Bootstrap 5 Setup</title>

<link rel="stylesheet" href="node\_modules/bootstrap/dist/css/bootstrap.min.css">

<script src="node\_modules/bootstrap/dist/js/bootstrap.bundle.min.js"></script>

<body>

<div class="container">

<div class="row">

<div class="col-12 col-md-6 col-lg-4 bg-primary text-white p-3">Column 1</div>

```

    <div class="col-12 col-md-6 col-lg-4 bg-success text-white p-3">Column 2</div>

    <div class="col-12 col-md-6 col-lg-4 bg-danger text-white p-3">Column 3</div>

  </div>

</div>

```

```
</body>
```

```
</html>
```

#### **Exercise 4.1: Design a two-column layout with a sidebar (col-md-3) and content area (col-md-9).**

```

<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Bootstrap 5 Setup</title>

  <link rel="stylesheet" href="node_modules/bootstrap/dist/css/bootstrap.min.css">

  <script src="node_modules/bootstrap/dist/js/bootstrap.bundle.min.js"></script>

```

```
<body>

  <div class="container">

    <div class="row">

      <div class="col-md-3 bg-light">Sidebar</div>

      <div class="col-md-9 bg-white">Main Content</div>

    </div>

  </div>

</body>

</html>
```

**Exercise 4.2: Create a four-column layout (col-sm-3) with equal width.**

```
<body>

  <div class="container">

    <div class="row">

      <div class="col-sm-3 bg-info">1</div>

      <div class="col-sm-3 bg-secondary">2</div>

      <div class="col-sm-3 bg-warning">3</div>

      <div class="col-sm-3 bg-success">4</div>

    </div>

  </div>

</body>
```

</body>

**Exercise 5.1: Use justify-content-center and align-items-center to center content inside a row.**

<body>

```
<div class="row justify-content-center align-items-center" style="height: 100vh;">
```

```
  <div class="col-6 bg-light p-5 text-center">Centered Content</div>
```

```
</div>
```

```
<div class="container">
```

```
  <div class="row">
```

```
    <div class="col-sm-3 bg-info">1</div>
```

```
    <div class="col-sm-3 bg-secondary">2</div>
```

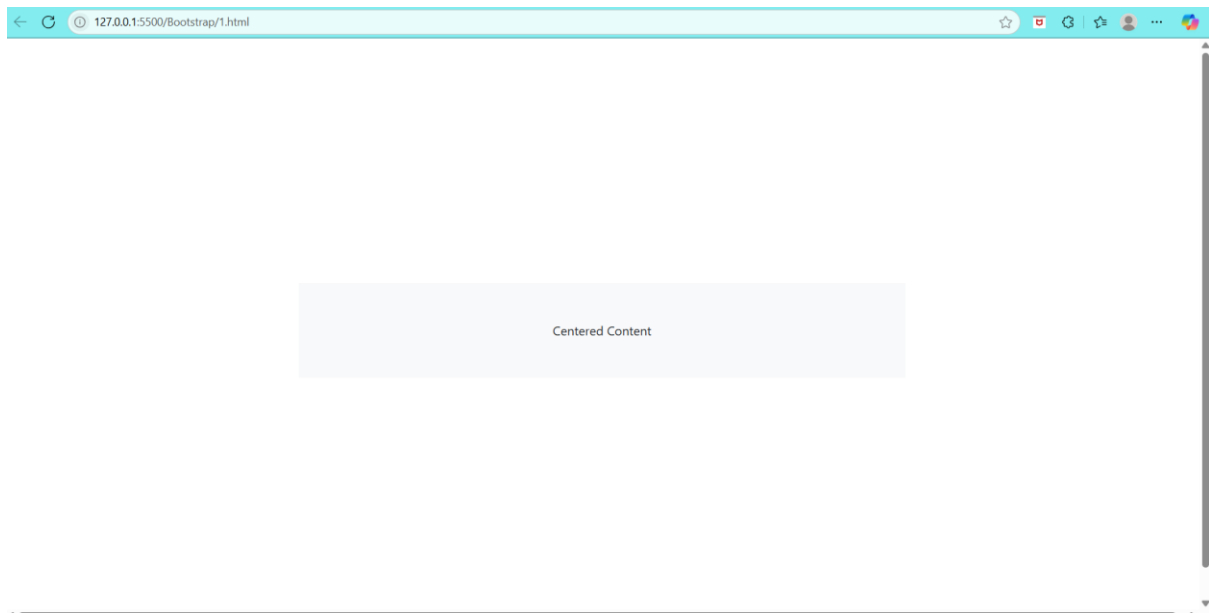

```
    <div class="col-sm-3 bg-warning">3</div>
```

```
    <div class="col-sm-3 bg-success">4</div>
```

```
  </div>
```

```
</div>
```

</body>

**Exercise 5.2: Reorder columns on different screen sizes using order-md-2, order-md-1.**

```
<body>
  <div class="container">
    <div class="row">
      <div class="col-md-6 order-md-2 bg-warning">Second on Desktop</div>
      <div class="col-md-6 order-md-1 bg-info">First on Desktop</div>
    </div>
  </div>
</body>
</html>
```

**Exercise 6.1: Create a navbar using d-flex, flex-column, and flex-md-row for responsive behavior.**

```
<body>

  <nav class="d-flex flex-column flex-md-row bg-light p-3">

    <a class="p-2" href="#">Home</a>

    <a class="p-2" href="#">About</a>

    <a class="p-2" href="#">Contact</a>

  </nav>

</body>
```

**Exercise 6.2: Use justify-content-between and align-items-center in a card layout.**

```
<body>

  <div class="card d-flex flex-row justify-content-between align-items-center p-3">

    <div>Content</div>

    <button class="btn btn-primary">Action</button>

  </div>

</body>
```

**Exercise 7.1: Create a sample page with different Bootstrap typography utilities: display-1, lead, text-muted, fw-bold, etc.**

```
<body>

  <h1 class="display-1">Display Heading</h1>

  <p class="lead">This is a lead paragraph.</p>

  <p class="text-muted">This is muted text.</p>

  <p class="fw-bold">Bold text.</p>

</body>
```

**Exercise 7.2: Use text-uppercase, text-lowercase, text-capitalize.**

```
<body>

  <p class="text-uppercase">uppercase</p>

  <p class="text-lowercase">LOWERCASE</p>

  <p class="text-capitalize">capitalize each word</p>

</body>
```

UPPERCASE

lowercase

Capitalize Each Word

**Exercise 8.1: Create a registration form using Bootstrap form components like form-control, form-check, and input-group.**

```
<form>

  <div class="mb-3">

    <label class="form-label">Name</label>

    <input type="text" class="form-control" id="name" placeholder="Enter your name">

  </div>

  <div class="form-check">

    <input type="checkbox" class="form-check-input" id="agree">

    <label class="form-check-label" for="agree">Agree</label>

  </div>

</form>
```

☒ Agree

**Exercise 8.2: Style a login form using form-floating.**

```
<body>

  <form>

    <div class="mb-3">

      <label class="form-label">Name</label>
```

```

<input type="text" class="form-control" id="name" placeholder="Enter your name">
</div>
<div class="form-check">
  <input type="checkbox" class="form-check-input" id="agree">
  <label class="form-check-label" for="agree">Agree</label>
</div>
</form>
<div class="form-floating mb-3">
  <input type="email" class="form-control" placeholder="Email">
  <label>Email address</label>
</div>
</body>

```

**Exercise 10.1: Create a responsive navbar with logo, navigation links, and a search form.**

```
<nav class="navbar navbar-expand-lg navbar-light bg-light">
```

```
  <a class="navbar-brand" href="#">Logo</a>
```

```
  <div class="collapse navbar-collapse">
```

```

<ul class="navbar-nav me-auto">

  <li class="nav-item"><a class="nav-link" href="#">Home</a></li>

</ul>

<form class="d-flex">

  <input class="form-control me-2" placeholder="Search">

</form>

</div>

</nav>

```

### **Exercise 10.2: Use nav, nav-tabs, nav-pills for creating tabbed navigation.**

```

<ul class="nav nav-tabs">

  <li class="nav-item">

    <a class="nav-link active" href="#">Tab 1</a>

  </li>

</ul>

```

**Exercise 11.2: Design a media object layout using media and align an image to the left of the content.**

```
<div class="d-flex">
```

```
    
```

```
<div>

  <h5>Media Title</h5>

  <p>Media body text.</p>

</div>

</div>
```

**Exercise 12.1: Apply margin (m-3, mt-4) and padding (p-2, py-5) utilities on layout sections.**

```
<div class="container">

  <div class="bg-primary text-white m-3 p-3">

    Margin 3 and Padding 3

  </div>

  <div class="bg-secondary text-white mt-4 py-5">

    Top Margin 4 and Vertical Padding 5

  </div>

</div>
```

### **Exercise 12.2: Build a pricing section where spacing improves the layout.**

```
<div class="container py-5">

  <div class="row text-center">

    <div class="col-md-4 mb-4">

      <div class="p-4 border rounded">

        <h4>Basic</h4>

        <p class="display-6">Rs 10</p>

        <button class="btn btn-outline-primary">Select</button>

      </div>

    </div>

    <div class="col-md-4 mb-4">

      <div class="p-4 border rounded">

        <h4>Intermediate</h4>

        <p class="display-6">Rs 50</p>

        <button class="btn btn-outline-primary">Select</button>

      </div>

    </div>

  </div>
```

```

<div class="col-md-4 mb-4">
  <div class="p-4 border rounded">
    <h4>Pro</h4>
    <p class="display-6">Rs 200</p>
    <button class="btn btn-outline-primary">Select</button>
  </div>
</div>
</div>
</div>
</div>

```

**Exercise 13.1: Create a dashboard page using contextual background classes (bg-primary, bg-warning, etc.) and text colors.**

```

<div class="container-fluid">
  <div class="row">
    <div class="col-md-3 bg-primary text-white p-3">Sidebar</div>
    <div class="col-md-9 bg-warning text-dark p-3">Main Content</div>
  </div>
</div>

```

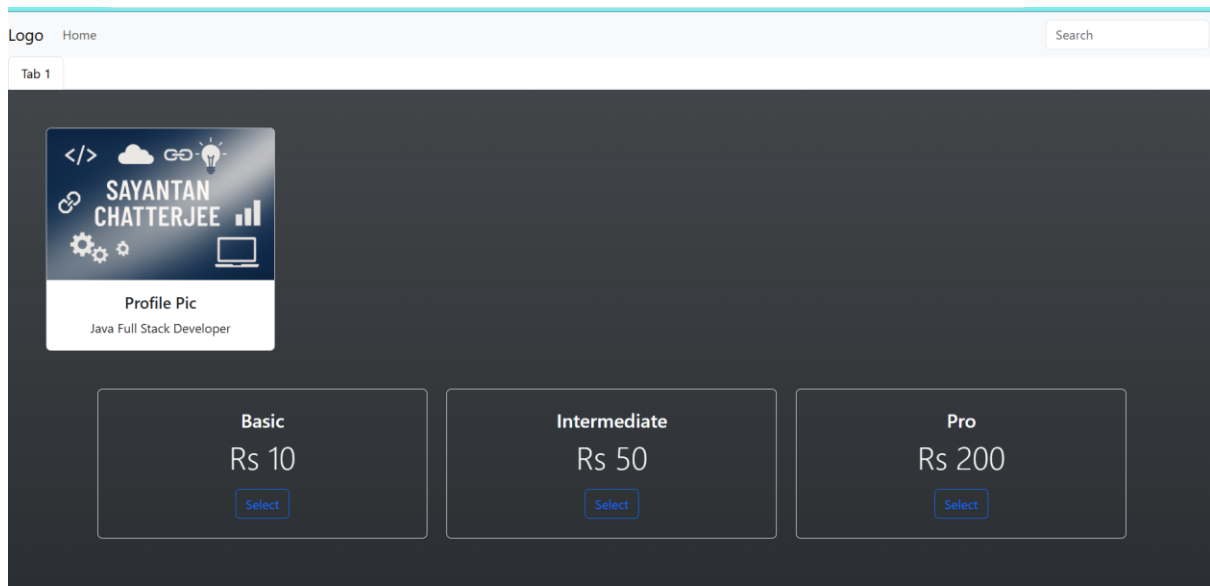

**Exercise 13.2: Use bg-gradient with bg-dark and white text.**

```

<div class="bg-dark bg-gradient text-white p-5 text-center">
</div>

```

### Exercise 14.1: Use d-none, d-md-block, d-lg-flex to hide/show sections based on screen size.

```
<div class="d-none d-md-block bg-info p-3">
```

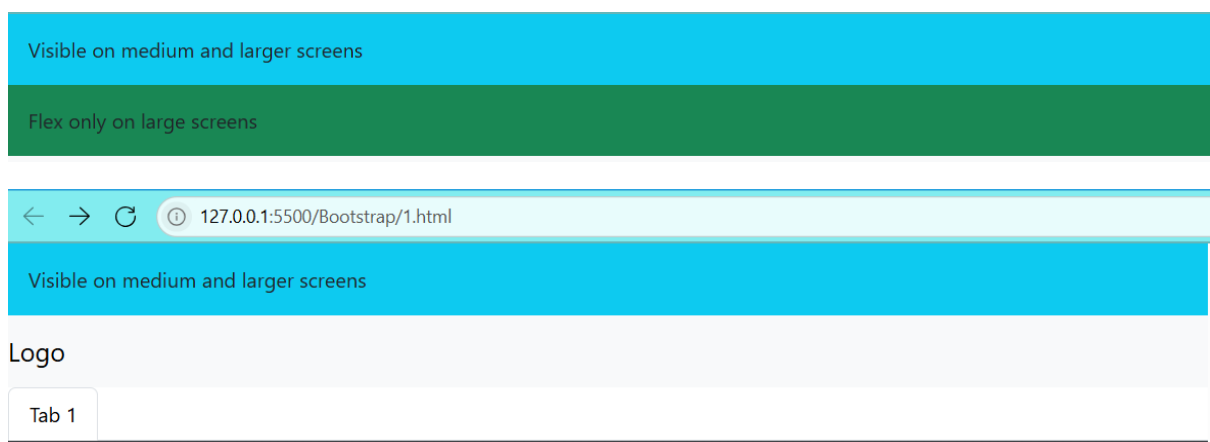

Visible on medium and larger screens

```
</div>
```

```
<div class="d-lg-flex d-none p-3 bg-success">
```

Flex only on large screens

```
</div>
```

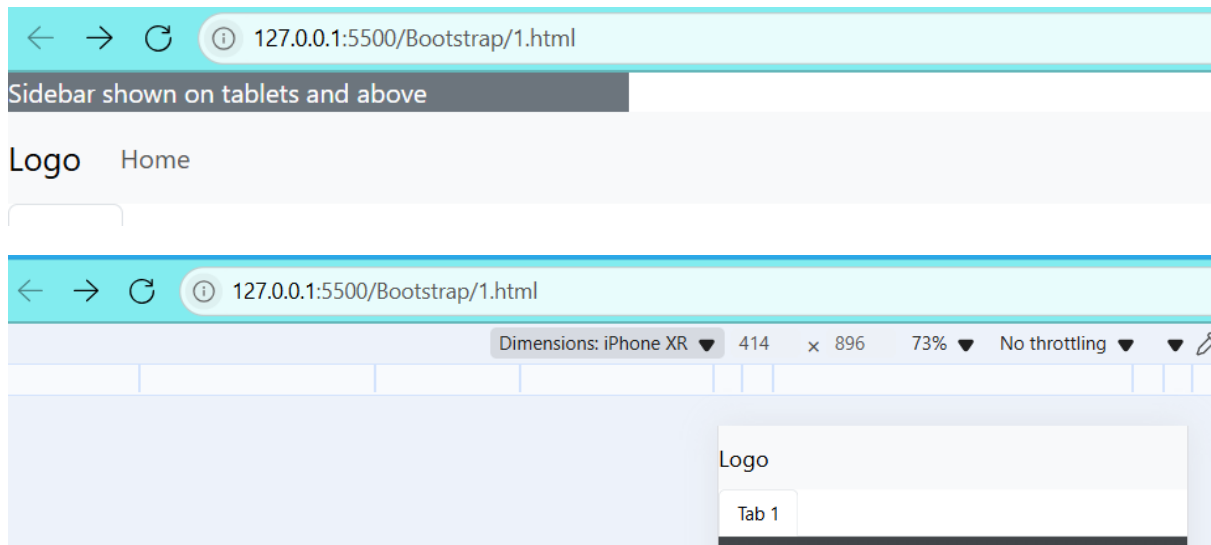

### Exercise 14.2: Create a responsive sidebar that only shows on tablets and above.

```
<div class="d-none d-md-block col-md-3 bg-secondary text-white">
```

Sidebar shown on tablets and above

</div>

**Exercise 15.1: Add border utilities like border, border-primary, border-3, and rounded-circle to an image.**

```

```

**Exercise 15.2: Use shadow, shadow-lg and rounded-pill in a card.**

```
<div class="card shadow-lg rounded-pill p-4">  
  <h5 class="card-title">Rounded Shadow Card</h5>  
</div>
```

### **Exercise 16.1: Create a fixed footer using position-fixed bottom-0.**

```
<footer class="bg-dark text-white text-center position-fixed bottom-0 w-100 py-3">
  &copy; Sayantan Chatterjee
</footer>
```

### **Exercise 16.2: Use position-relative and position-absolute to overlay a badge over an image.**

```
<div class="position-relative d-inline-block">
  
  <span class="badge bg-danger position-absolute top-0 start-100 translate-
middle">New</span>
</div>
```

**Exercise 17.1: Install and use Bootstrap Icons in a webpage: add social media icons in the footer.**

```
<footer class="bg-dark text-white text-center position-fixed bottom-0 w-100 py-3">
```

```
&copy; Sayantan Chatterjee <footer class="text-center">
```

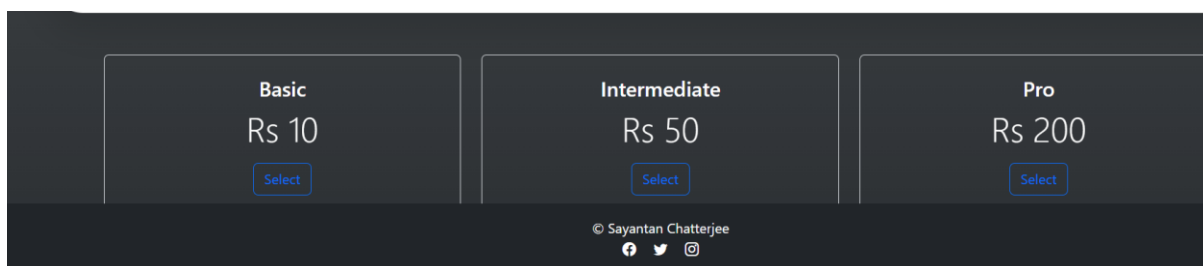

```
<i class="bi bi-facebook me-3"></i>
```

```
<i class="bi bi-twitter me-3"></i>
```

```
<i class="bi bi-instagram"></i>
```

```
</footer>
```

```
</footer>
```

**Exercise 17.2: Replace text buttons with icon-only buttons using Bootstrap Icons.**

```
<button type="button" class="btn btn-primary" title="Delete">
```

```
<i class="bi bi-trash"></i>
```

Delete

```
</button>
```

### Exercise 18.1: Add a modal popup triggered by a button.

```
<div class="modal fade" id="myModal">
```

```
<div class="modal-dialog">
```

```
<div class="modal-content">
```

```
<div class="modal-header">
```

```
<h5 class="modal-title">Modal Title</h5>
```

```
<button type="button" class="btn-close" data-bs-dismiss="modal" title="Close  
modal"></button>
```

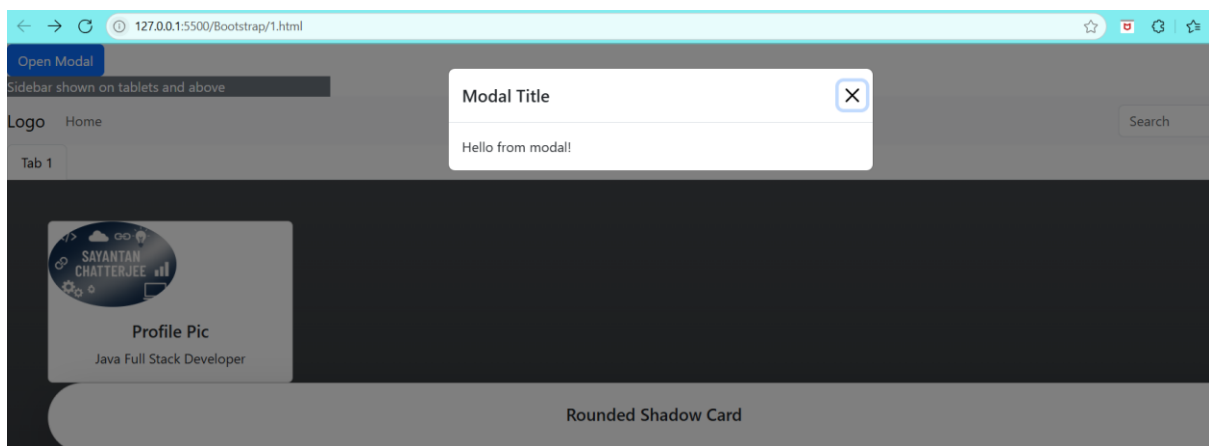

```
</div>
```

```
<div class="modal-body">Hello from modal!</div>
```

```
</div>
```

```
</div>
```

```
</div>
```

### **Exercise 18.2: Create a collapsible accordion using accordion and Bootstrap JavaScript behavior.**

```
<div class="accordion" id="myAccordion">

  <div class="accordion-item">

    <h2 class="accordion-header" id="headingOne">

      <button class="accordion-button" data-bs-toggle="collapse" data-bs-
target="#collapseOne">

        Accordion Item #1

      </button>

    </h2>

    <div id="collapseOne" class="accordion-collapse collapse show" data-bs-
parent="#myAccordion">

      <div class="accordion-body">This is the first item's content.</div>

    </div>

  </div>

</div>
```

### **Exercise 19.1: Set up a Bootstrap 5 project with Sass using npm.**

### **Exercise 19.2: Customize primary colors and border radius via `variables.scss` and recompile Bootstrap.**

html

```
<link rel="stylesheet" href="css/bootstrap-custom.css">
```

Custom scss

```
$primary: #ff5722;
```

```
$border-radius: 1rem;
```

```
@import "../node_modules/bootstrap/scss/bootstrap";
```
